Correcting Biden

In an interview Joe Biden refers to the top 1% who make over $1.4 million dollars in income. This is typical of much other misinformation from Biden.

The dividing point for the top 1% is $388,806 according to the most updated information from the Tax Foundation.

The point to be in the top 5% is $153,542.

For the top 10% it is $108,904.

For the top 25% it is $64,702.

Mark my word it will be the top 25% that will be targeted.
